

CONVERSION PATH QA

CROW TECH QA INTELLIGENCE

Conversion Path QA

Read-only deterministic inspection of declared same-origin pages and direct-anchor evidence, with zero browser interactions.

DECLARED START

ANALYSIS COMPLETED

2026-07-24T13:41:52.361Z

3 DECLARED PAGES	0 COMPLETE DOM PAGES
12 DIRECT-ANCHOR CHECKS	0 CONFIRMED FINDINGS

Scope: 3 customer-declared same-origin pages and 12 bounded direct-anchor destination checks under policy 1.0.0; operational limits and incomplete observations are not defects.

EXECUTIVE SUMMARY

2 declared checkpoints produced 0 reachable outcomes, 0 redirected outcomes, 0 repeatably unreachable outcomes, and 2 inconclusive outcomes. The deterministic ledger retained 0 findings and 4 operational or inconclusive issues.

What was not exercised

No form was typed into or submitted; no link, button, menu, consent control, or other DOM control was clicked or focused. No authentication, account creation, purchase, or real conversion was attempted. This bounded run does not verify end-to-end conversion, analytics/tracking, conversion rate, lead delivery, sales, checkout/payment completion, eligibility, or SEO.

DECLARED CHECKPOINT OUTCOMES

ID	CHECKPOINT	PUBLIC PATH	OUTCOME
CP-001	Our Clients	https://crow.sg/our_clients/	inconclusive
CP-002	About us	https://crow.sg/about_us/	inconclusive

PATH TRANSITIONS

ID	SOURCE	TARGET	DIRECT NAMED ANCHOR
T-001	PAGE-001	CP-001	present
T-002	PAGE-002	CP-002	present

CONFIRMED FINDINGS

No definitive deterministic issue met the v1 finding rules.

COVERAGE AND INVENTORIES

15 bounded server requests; 3 declared-page render attempts; 128 visible control retaineds; 3 form inspected; 9 required field inspected; 103 bounded browser requests; 6 external browser requests blocked. Server requests count every dispatched redirect hop.

CTA and form rows are observations. A button, JavaScript handler, or form was never inferred to reach a checkpoint, and an inspected form was never claimed to work.

SNAPSHOTTED METHOD LIMITS

AREA	IMMUTABLE V1 LIMIT
Journey	6 declared pages (5 checkpoints), 12 unique direct-anchor destinations, 6 render attempts, 0 interactions
Server transport	2 checks/declared page, 3 redirects/check, 36 requests/run, concurrency 2, 1048576 bytes/response, 12582912 bytes/run
Time	8000 ms/server request, 12000 ms/render attempt, 180000 ms/run
DOM evidence	120 controls/page, 40 anchors/page, 30000 nodes/page, 12 forms/page, 30 fields/form, 8 blocker matches/page, 500 evidence rows
Retained values	160 text chars/control, 256 locator chars, 2048 URL chars, 2048 query-redaction values and 262144 query-redaction chars/run

AREA	IMMUTABLE V1 LIMIT
Browser per page / run	60/240 requests, 30/100 blocked requests, 60/240 DNS validations, 3145728/12582912 bytes

Limit hits and incomplete work remain operational or inconclusive; they are not customer defects.

OPERATIONAL / INCONCLUSIVE LEDGER

These rows are limits or uncertainty, not customer defects.

browser_policy_blocked · PAGE-001
One or more browser requests were denied by the same-origin/no-mutation policy; absence claims were suppressed where completeness could be affected.
browser_policy_blocked · PAGE-002
One or more browser requests were denied by the same-origin/no-mutation policy; absence claims were suppressed where completeness could be affected.
browser_policy_blocked · PAGE-003
One or more browser requests were denied by the same-origin/no-mutation policy; absence claims were suppressed where completeness could be affected.
anchor_check_cap
The twelve-destination anchor-check cap was reached; omitted destinations are not defects.

METHOD BOUNDARY

- Only the customer-declared same-origin pages and up to twelve direct same-origin anchor destinations were admitted.
- Server requests were resolved under the public-IP policy, bound to an admitted resolved address, manually redirected, byte-bounded, and rechecked before each hop.
- Browser traffic was isolated, same-origin, GET/HEAD-only, bounded, and fulfilled through the bound transport. External target traffic, WebSockets, and mutation methods were blocked.
- No screenshots, HTML, DOM snapshots, credentials, cookies, arbitrary headers, query values, analytics checks, or third-party target responses are retained.

The PDF, Markdown, evidence, scope, inventory, page manifest, and reproduction artifacts share the exact completion and expiry timestamps above.
